

# JAN 04 EPISODE WORKSHEET

PLUG IN TO YOUR BUSINESS & YOUR LIFE PAUL DARBY PODCAST

**NOTE:** All membership levels get tonight's worksheet. Free members may continue to get links, resources and overviews by becoming Premium Members.

## Points of discussion in today's episode:

- 1) If you want to be successful you have to PLUG IN, take part, commit and do the business, do things, take the activity, DO the action of the business. And keep doing it.
- 2) Do not just buy the business and then stop thinking about it while looking for something else as buying the business is your starting point not.. NOT where you quit.

## Overview:

We have a new studio coming so we can offer a better experience for guests, members and staff.

Be kind, be courteous, don't join the herd. Never quit once you have decided to start. And once you have decided to start go ahead and start. Don't look for a way "Out", decide to win or die... I mean don't actually die, just work and think as that is the only way you will be stopped.

Continued...

**Plug into your business**, meaning be ACTIVE, take part in your own success story! So many people don't get it that wishing they were successful, or having lot's of reasons that they are not successful, is-not-as-good-as-being-successful.

Be aware that it is easy to simply do what we've been doing or what others around us are doing. Don't be in the herd!

Model successful people, do what they are doing, pretty soon you will have what they have! Go to the link I provided and WATCH the video and be active in your thoughts about if it can and how it can serve to help you.

Have fun, we are not going to be here long, we may as well make a bunch of money doing cool stuff and have some fun on this journey.
